Preliminary property analysis

Birch Street Sample - Northline - static synthetic fixtures

Simulation notice. This report uses fictional property, market, comparable-sale, rental, and renovation data. It demonstrates software behavior; it is not a real property analysis, appraisal, contractor quote, lending request, or investment recommendation.

Property snapshot

Asking assumption **$118,000**	Rent assumption **$1,325 / mo**	Existing facts **3 bd / 1 ba**	Living area **1,040 sqft**
Comparable sale median **$151,000**	Renovation scenario **$30,763**	Monthly cash flow **-$338**	DSCR **0.45**

Property and market evidence

Fictional one-story home with an unfinished basement and dated interior finishes. Market context: older detached homes, modest lot sizes, and a broad range of renovation needs. All property facts, three sale observations, and three rental observations are synthetic examples.

Comparable sales

FICTIONAL COMP	SALE PRICE	AREA	LAYOUT
Birch Street Comp A	$151,000	1,080 sqft	3 bd / 1 ba
Pine Avenue Comp B	$158,500	1,120 sqft	3 bd / 2 ba
Elm Court Comp C	$146,000	980 sqft	2 bd / 1 ba

Rental reference median: $1,395 / month. Examples are simulated asking rents, not achieved or approved rents.

Preliminary renovation budget

Strategy: interior refresh. Similarity-weighted mean of the five closest fictional project records; per-area rates are scaled by the subject area. Low/high are observed ranges in selected synthetic analogs, not confidence bounds.

WORK PACKAGE	SCENARIO ESTIMATE	SYNTHETIC ANALOGS
Kitchen refresh	$9,000	5 fictional analogs
Existing bathroom refresh	$4,530	5 fictional analogs
Flooring	$6,240	5 fictional analogs
Paint and finish	$3,588	5 fictional analogs
HVAC service allowance	$4,328	5 fictional analogs
Exterior repairs	$3,077	5 fictional analogs
TOTAL PRELIMINARY SCOPE	**$30,763**	Contractor review pending

Project costs and timing

Calculated from the current sample scope and displayed assumptions

Financial scenario

SCENARIO RESULT	AMOUNT	INTERPRETATION
Estimated NOI	$3,370 / yr	Annual, before modeled debt service
Annual debt service	$7,426	75% LTV, 7.5%, 30-year term
Monthly cash flow	-$338	After modeled debt service
DSCR	0.45 x	Scenario ratio
Cash-on-cash	-6.3%	Stabilized annualized scenario

Project uses - reconciled

PROJECT-USE COMPONENT	SCENARIO BASIS	AMOUNT
Acquisition price	Entered scenario assumption	$118,000
Preliminary renovation scope	Selected synthetic scope total	$30,763
Closing costs	3.0% x acquisition price	$3,540
Initial reserves	Entered scenario assumption	$1,000
TOTAL PROJECT USES	**Sum of four components**	**$153,303**

Construction timing sensitivity

DURATION	REPAIR + LEASE-UP NO-RENT MONTHS	FIRST-YEAR OPERATING CASH FLOW	ADDED CARRY
4 weeks	2	-$7,191	$700
6 weeks	3	-$8,759	$1,050

Review before relying on a real property analysis

- Confirm property identity and all property facts.
- Inspect concealed systems and verify repair needs.
- Obtain a complete contractor scope and validate costs.
- Verify achieved rent and financing terms.

All values are static fictional fixtures. Unknown property costs are excluded. Financial metrics depend on explicit hypothetical assumptions and do not establish property condition, value, rent, lender approval, or acquisition suitability.
